# Mappt™
## Mapping Better

# MINING AND ENERGY

## Offline, agile and efficient, Mappt™ is the perfect mobile GIS for mine sites

### POINTS, LINES & POLYGONS
Real time field mapping for collection and validation of geological data

### CUSTOM IMAGERY
Load your own hi-res orthophotos in either ECW or JP2 directly into Mappt™

### THEMATIC MAPPING
Attribute based classification of your data to reveal data characteristics

### DROP DOWN FORMS
Rapid data collection using easily customisable drop downs

### GEOFENCING
Protect heritage, flora and fauna exclusion zones using geofencing alerting capability in Mappt™

### WMS/WFS SUPPORT
Access web services from 3rd party data providers whilst in the field

With Mappt™ there is no vendor lock in, so it works with all major GIS applications

## TESTIMONIAL

*"I'm using Mappt as an advanced GPS because with normal GPS you don't have base maps, which makes it hard to see where you actually are apart from numbers on a screen, so Mappt really helps with that. Plus paper maps are a pain, and having something on a small format you can look at, play with and navigate is really handy. As far as minimising the amount of gear you have to carry, it makes a big difference."*

Andrew Margereson, CSA Global
